

Meet Our Hospital Director

Dr. Dunbar pointing out a hip problem to the pet's owner

Allen D. Dunbar D.V.M.

Doctorate: Michigan State University 1977, Highest Honors
Member: American Veterinary Medical Association, American Animal Hospital Association, Wisconsin Veterinary Medical Association, Northeast Wisconsin Veterinary Medical Association (past president), Phi Zeta Veterinary Honor Society

Dr. Dunbar received his veterinary doctorate from Michigan State University. After graduating with highest honors in 1977, he relocated to Northeast Wisconsin after serving an internship in a large multidocor specialty practice in Massachusetts. Since that time, he has been involved in patient care for local pets, and provides consultation and referral services for over 200 veterinarians in Wisconsin and Upper Michigan.

"I believe it is my responsibility to inform my clients not only what can be done for their pet, but also what I recommend is best for their pet."

Dr. Dunbar has extensive advanced training in several areas of pet care including eye, spinal and bone conditions and has over 26 years of experience in clinical private practice. Dr. Dunbar is a recognized authority in the veterinary community.

When your pet needs to see the doctor...
...care enough to seek the very best!

We invite you to discover what our special care, training and experience can mean for your pet.

Keep your pet healthy through preventative veterinary care.

Our Wellness Program promotes animal health. By packaging together groups of recommended and needed services, we are able to pass on a savings to you.

▼ **Immunizations** We send reminder postcards when booster vaccinations are needed. We use the best vaccine available to insure that your pet develops a high protective antibody level to prevent infection should they become exposed to the disease. Using the best vaccine also limits vaccine associated 'reactions'.

▼ **Heartworm prevention & treatment** Heartworm disease continues to remain a serious problem for dogs and cats in Wisconsin. It is easily prevented by administering preventative medication. We blood test every dog each year before prescribing more preventative medication to insure that no serious consequences develop. Although there is no effective test for feline heartworm disease, if left unprevented, heartworm is fatal. Because of this, the need for preventative medication is even greater. Should your pet test positive, rest assured that we have successfully treated many dogs that have had heartworm.

▼ **Dentistry** Preventive dental health care is very important. We can outline a specific plan for home and periodic in-office care. By preventing gum infections, we limit bacteria affecting other areas of the body including the kidneys, liver and heart.

Packerland Veterinary Center

is a unique veterinary hospital that provides general medical and surgical pet care for the surrounding community and assists over 200 other veterinarians in Wisconsin and Upper Michigan with the diagnosis and treatment of advanced pet problems. Our offices are dedicated to technical excellence and personal concern for your pet at each stage of their life.

Your pets deserve the best care available

Our staff includes graduates from the finest veterinary schools in the country. Although we prefer to maintain a specific doctor/owner/pet team, we are able to draw on the expertise of other doctors within our own practice who have their own areas of special interest, to assist in the care of difficult problems.

You've come to the right place!

CONVENIENCE

- Convenient West side location, with easy access to Hwy 41 and Hwy 29
- Weekday, evening (until 8 PM) and weekend appointments
- Appointments are preferred, but we understand the importance of prompt attention to emergency situations

AFFORDABLE PET CARE

- We are concerned with keeping the cost of pet care within reason.
- We offer flexible payment options. For your convenience, we accept cash, personal checks, Visa, Mastercard, Discover and Care Credit.
- We have a unique pricing method for immunizations that prevents you from being charged multiple examinations on the same pet, which means lower costs for you.
- Cost estimates are readily available.

COMPLETE

In-house laboratory for prompt test results - coagulation tests, complete blood count, individual blood chemistries, urinalysis, fecal analysis, feline leukemia testing, etc.

Diagnostic capabilities rarely seen in veterinary hospitals - rigid and flexible endoscopy, computer analyzed EKG, ultrasound, etc.

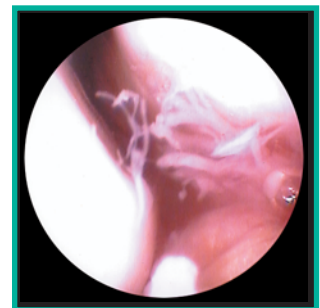

Surgical facilities and abilities second only to that found in university settings - general surgery, advanced orthopedic, spinal, eye, chest, abdomen, laparoscopy, thoracoscopy, cystoscopy, rhinoscopy, etc.

Video arthroscopy

Normal cruciate ligament as seen through an arthroscope

Torn cruciate ligament diagnosed via arthroscopy
