

Theory of Wellness

Our Wellness Program has been developed to promote animal health. By packaging together groups of recommended and needed services, we are able to pass on a savings to you.

*Allen D. Dunbar D.V.M.
Hospital Director*

Our aim is to give our patients quality health care such as routine vaccinations, dental care, parasite control, and routine surgeries. All of these will help make your pet's life a long and happy one. And after all, a loving owner will lead to a loving pet.
